## **CLEAN UP DAY**

On a cold and wet day almost thirty people showed up to undertake the many activities to make the club house and grounds presentable. On arrival we found that the power was out since the previous day at about 2 pm – it returned about 11 am as we were working so we were able to have hydro and hot water for vacuuming and other duties. As a result of the ice storm a day earlier there were many large tree branches that were moved to to the other side of the driveway.

The outside furniture has been moved out, the nets have been repaired, the inside pine chairs are in the process of being repaired by John Wheelwright, the benches have been located around the ponds, etc. Still to be done are repairs to the outside tables to make them serviceable for another year or two and the construction of additional benches. The wood which was wet and frozen has been moved into the barn.

Many thanks to all who turned out and to Con Smyth and Wally Jurman for barbequing the hamburgers and hot dogs enjoyed by all.

## **FISH**

As noted in an earlier note we still have our supplier of brook trout and are pleased to advise you that 250 were delivered on April 23<sup>rd</sup>.

There are reports that many large fish are being caught so it was a very successful feeding program over the winter. Thanks to all who participated.

## **OPENING DAY**

Opening Day will be on Sunday May 5<sup>th</sup> and if you have changed your plans regarding attendance please let me know.
